

INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP02/08504

A. CLASSIFICATION OF SUBJECT MATTER
Int.Cl⁷ A61N5/10

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
Int.Cl⁷ A61N5/00-5/10Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched
Jitsuyo Shinan Koho 1926-1996 Toroku Jitsuyo Shinan Koho 1994-2002
Kokai Jitsuyo Shinan Koho 1971-2002 Jitsuyo Shinan Toroku Koho 1996-2002

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	JP 33-10100 B1 (Naoto AOKI), 21 November, 1958 (21.11.58), Full text; Figs. 1 to 7	1, 4-15, 22-23
Y	Full text; Figs. 1 to 7 (Family: none)	2-3, 16-21, 24
Y	JP 52-18073 Y1 (Shimadzu Corp.), 23 April, 1977 (23.04.77), Full text; Figs. 1 to 5 (Family: none)	2-3

☒ Further documents are listed in the continuation of Box C.☐ See patent family annex.

* Special categories of cited documents:
 "A" document defining the general state of the art which is not considered to be of particular relevance
 "E" earlier document but published on or after the international filing date
 "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
 "O" document referring to an oral disclosure, use, exhibition or other means
 "P" document published prior to the international filing date but later than the priority date claimed

"I" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
 "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
 "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
 "&" document member of the same patent family

Date of the actual completion of the international search
08 November, 2002 (08.11.02)Date of mailing of the international search report
26 November, 2002 (26.11.02)Name and mailing address of the ISA/

INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP02/08504

Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☒ Claims Nos.: 37, 38

because they relate to subject matter not required to be searched by this Authority, namely:

Claims 37, 38 correspond to a method of treating a human body and relate to a subject that does not require the international searching authority to make a search, in accordance with the provision of PCT Article 17 (2) (a) (i) and PCT Article 39. 1 (iv).

2. ☐ Claims Nos.:

because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claims Nos.:

because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

The inventions according to Claims 1-24 are inventions of a radiotherapeutic device having a support member of rotating a guide around the axis of an inclined shaft.

On the other hand, the inventions according to Claims 25-36 are inventions of a radiotherapeutic device having a diagnostic imager, a controller, and a 3-axis orthogonal type positioning device.

And, no special technical feature common to these inventions can be found. Accordingly, Claims 1-24 and Claims 25-36 do not satisfy the unity.

1. ☒ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest ☐ The additional search fees were accompanied by the applicant's protest.

☒ No protest accompanied the payment of additional search fees.
